

We claim:

- 1           1. A fully disposable toilet brush comprising:  
2           a cardboard tube; and  
3           a open-cell sponge formed with a plurality of ribs  
4           fitted on an end of said cardboard tube.
  
- 1           2. The toilet brush defined in claim 1 wherein said  
2           ribs are angularly offset about the sponge in a regular pattern.
  
- 1           3. The toilet brush defined in claim 2 wherein said  
2           sponge has a central hole and said cardboard tube is fitted into  
3           said hole.
  
- 1           4. The toilet brush defined in claim 3, further  
2           comprising an adhesive bonding said sponge to said cardboard  
3           tube.
  
- 1           5. The toilet brush defined in claim 4 wherein said  
2           ribs have outwardly convex rounded contours.

1               6. The toilet brush defined in claim 5 wherein said  
2 sponge has V-section grooves between said ribs.

1               7. A package comprising a pouch of a packaging  
2 material and two fully disposable toilet brushes in said pouch,  
3 each of said fully disposable toilet brushes consisting of a  
4 cardboard tube, and a open-cell sponge formed with a plurality of  
5 ribs fitted on an end of said cardboard tube.
